Information Services - Inception

- As part of her review of Professional Services, the Secretary Designate investigated a new model for the delivery of Library and IT services at HWU.
- The model which is commonly found in other universities, and in particular Scottish universities, is an *integrated* Library and IT service.
- The objective of the proposed *single directorate* is to provide *effective and integrated* IT and Library services to support teaching, learning, research and administration across the University.
- The recommendations were agreed and recruitment of a Director began in September 2010.

Information Services - Rationale

- The Library and IT functions do not currently have strong strategies for the future delivery of modern services to HWU's staff and students.
- Modern strategies for Library & IT services are ***inextricably linked*** in that their ***mission and vision are combined*** in a commitment to delivering services which ***enhance excellence*** in the delivery of teaching, learning (including distance learning) and research.
- Library and IT services will need to ***embrace innovation and continuous review*** if HWU is to remain cutting edge in terms of support for teaching and research and provide an excellent student experience.

Information Services - Challenges

Vital services are delivered well every day, but a strategic vacuum exists:

- Aging physical infrastructure – Library building, data networks, telephone systems require major investment – currently no University master-plan for estate renewal.
- Historical revenue funding – Tribal benchmarking indicated Library under-resourced by ~£0.5M pa whilst total IT spend ~£1M pa above comparator group.
- Patchy and barely adequate information systems & unreliable IT infrastructure.
- Stable and professional but disjoint and divergent customer-facing services.

Information Services – Strategic Challenges

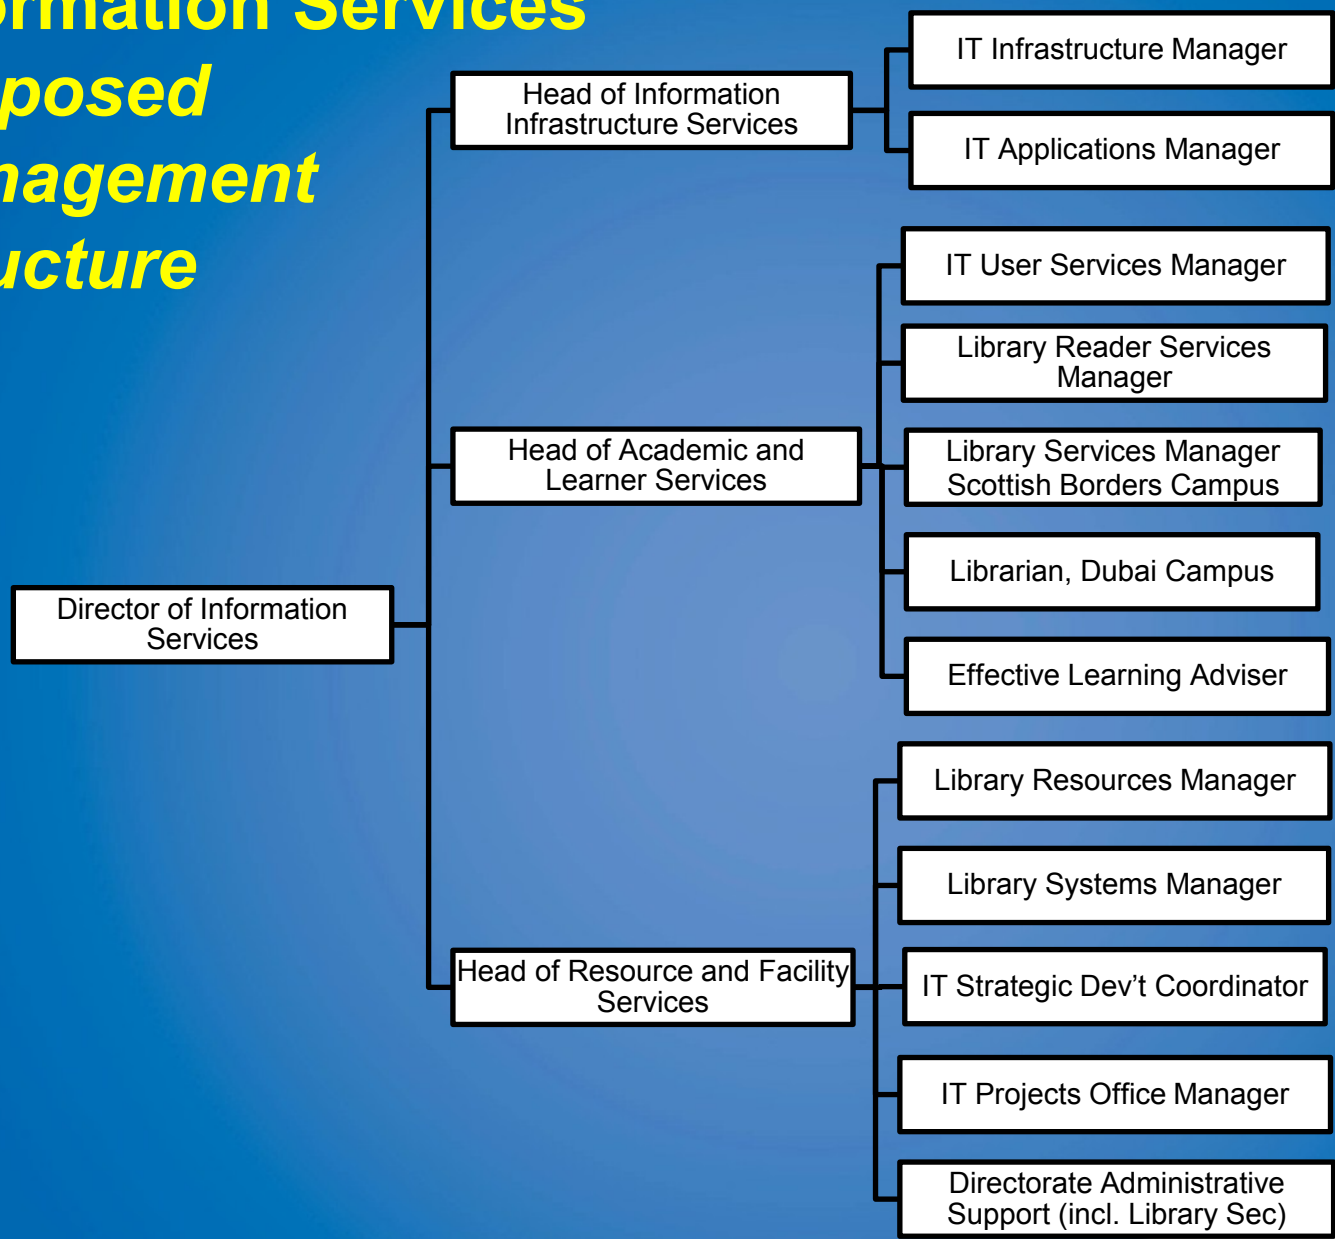

- Vital services may continue to be delivered well every day, but we must continually drive standards upwards
- There will be intense competition for reinvestment at Edinburgh; we must ensure the information infrastructure & facilities meet changing needs & expectations
- Areas for specific strategic focus:
 - Developing and managing excellent support for students and staff.
 - Developing and managing the information resources and facilities to match evolving needs.
 - Developing and managing high quality information systems & IT infrastructure.

Information Services – Strategies Required

- Academic & Learner Services
 - IT User / Library Reader Help & Advice Strategy
 - Schools Liaison & Bespoke Provision Strategy
 - Education & Training Strategy
 - Communications & Marketing Strategy
- Information Resources & Facilities
 - Collection Development Strategy
 - Facilities Development Strategy
- Information Infrastructure
 - Information Systems Strategy
 - IT Infrastructure Strategy

Information Services

Proposed Management Structure

Information Services – Autumn 2012 Update

Three new Heads of Service posts established & filled:

- Wendy Pirie is *Head of Academic & Learner Services*, responsible for developing and delivering customer-facing and Schools liaison functions
